

Meridian Computer is now available on line

Instead of classroom training for nursing students, Meridian Health is offering online training for nursing students. The training tutorials are available at <http://www.meridianhealth.com/training> . A generic login and password is needed to access the site. The login is **nursing** and the password is **Training1** and is case sensitive. All learning modules can be accessed from this site and will require a flash viewer installed on the students PC. The training modules are divided into two categories; OAS/Gold and Soarian. Students who were never trained at a Meridian facility will need to complete both the OAS/Gold and Soarian modules. Those students returning to a Meridian facility and who were trained prior to August 2007, will need to complete the Soarian module only.
