

Articulate Presenter

- Very professional appearance
- Designed especially for Powerpoint presentations
- Can import separate audio tracks
- Built-in Audio Editor
- Can add Presentation Options such as logos, playlists, and presenters
- Can control View Modes during presentation such as sidebar view, slide only view
- Contains Player Templates which specify the behavior and appearance of the Articulate Presenter Player. Presentation displays with Play Controls so that the viewer can control branching, re-play. Instructor can restrict this navigation if desired
- Easy, 2-step publishing process can be done by instructors for Web(Flash), iPod, and CD formats
- Can accommodate very large files with brief and rapid load times
- Presentation easily editable once created on a slide by slide basis, no timeline to sort out.
- Compatible with iPods – publish as mp3 files
- Can add special effects at any time such as spotlights, and outlines. Recording can be done first and annotations can be added – and/or modified – afterwards. Timings can be set for “on-click” animations. Also available are special effects such as bounce, fade and loop
- Can insert hyperlinks/videos as part of presentation; converts video to Flash format
- Articulate Presenter is a SCORM-compliant authoring tool – easily plugs into the Learning Management System.

Articulate Studio Products

- Presenter – adds **interactivity** and narration to PowerPoint slides. Can include various animated annotations to highlight and add interest to material.
- Quizmaker – gives the ability to create professional, custom quizzes and integrate into Presenter slides presentation. Can create multiple-choice, true/false and Likert questions. Can also create drag-and-drop questions, matching, and more. Quizzes can be designed in such a way that the user’s progress through the presentation is event-controlled
- Engage – Allows the instructor to produce interactive learning activities. Students can examine in greater detail each step of a process; drill down into key elements of a diagram to better understand the main points, etc.
- Video Encoder – converts almost any video in to Flash video format that can be added to Presenter slides, or used to enrich Quizmaker quizzes and Engage interactions.
