Did You Know...

The best way to include a  video in your course is to use the Google™ Media  button in ANGEL.

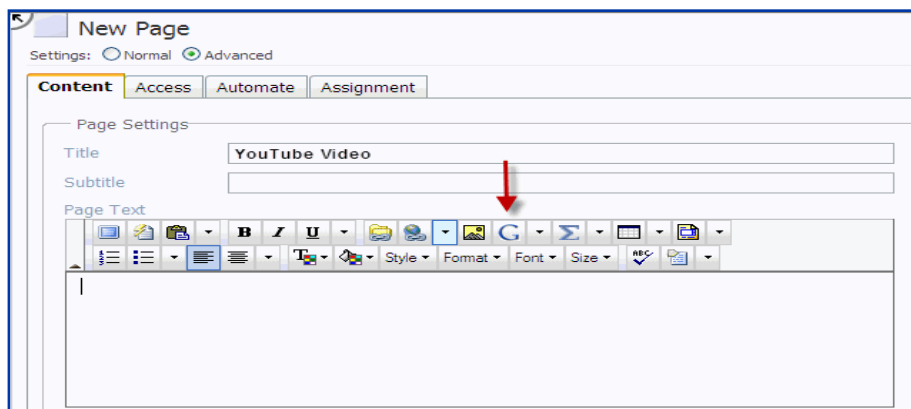

In your ANGEL shell, go to the place where you want your video to reside and click **Add Content:**

From the list of items, select **Page:**

When the New Page screen appears enter a Title, and then click the  button:

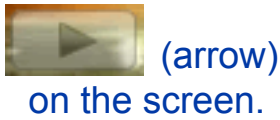

(OVER)

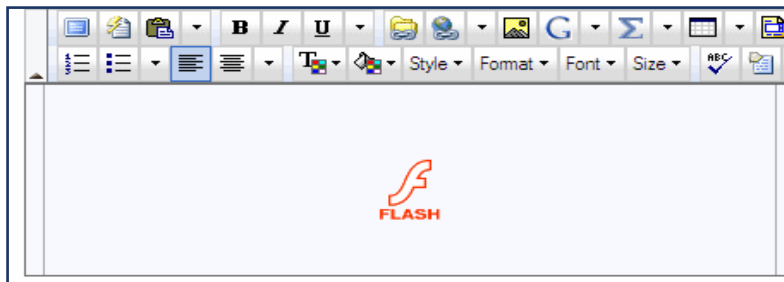

(CONTINUED)

Locate your video by entering a search string and click **Go**.

To preview the video, click the

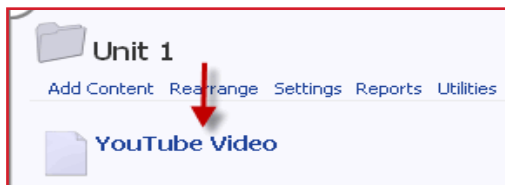

To place the video in your ANGEL course, click the **embed** button.

The video appears on the page as a Flash object.

(Click **Save**.)

To view the video, click on the link:

Click on the arrow to play the video.

Note to users who have existing direct-links to YouTube videos in their ANGEL shells: These links will no longer work; they must be embedded into a Page for direct viewing from within the course.
