

Canvas Tips for Faculty

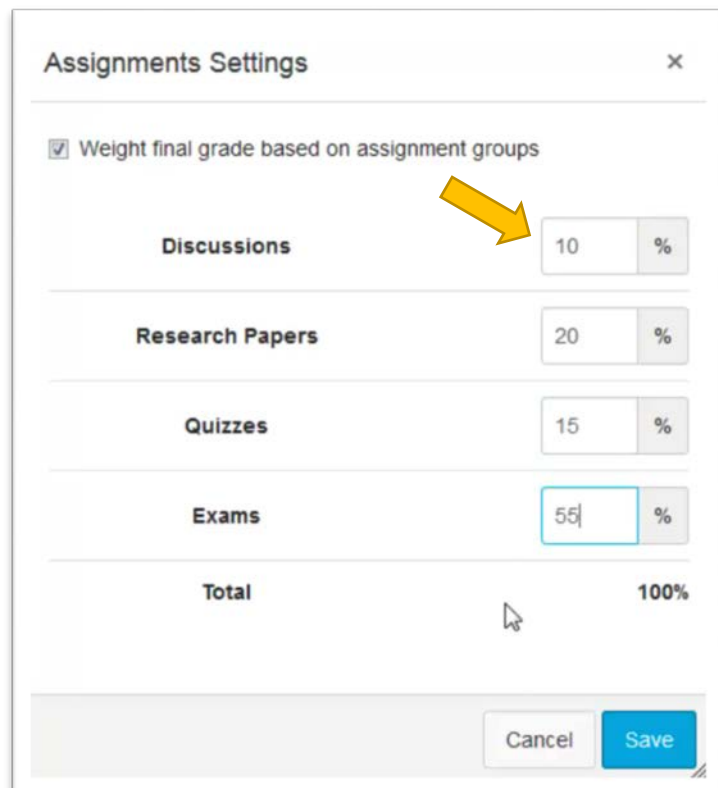

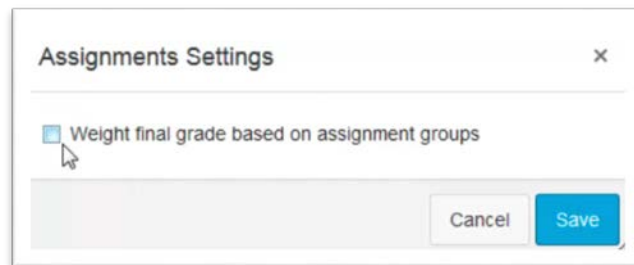

Assignment Group Weights

Canvas allows you to assign grade weights to Assignment Groups in your course. This section is a continuation of the chapter on “Assignment Groups”.

To set this up, click on the Gear icon to the right of the blue +Assignment button to access the Assignment settings.

Check the box that says “**Weight final grade based on assignment groups**”. A list appears of all your Assignment Groups, and you can enter your desired values in the fields to the right.

When you are finished, click **Save**. Student’s grades will be based on these calculations.
