

Canvas Tips for Faculty

Prerequisites and Date Locks

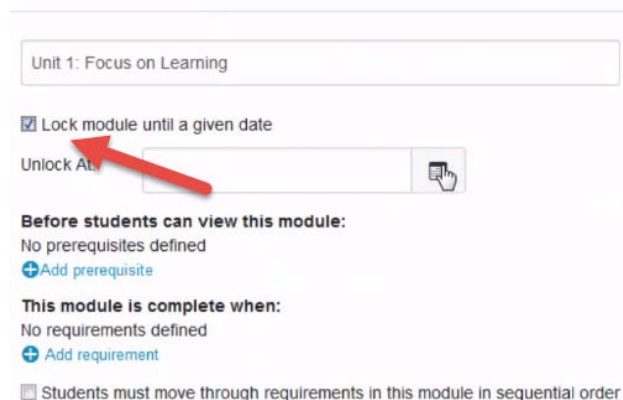

1. Canvas enables you to lock student access to a module until a certain date passes or until prerequisite material is satisfied. To lock by date, locate the module you wish to lock and click the gear icon to the far right of the module title.

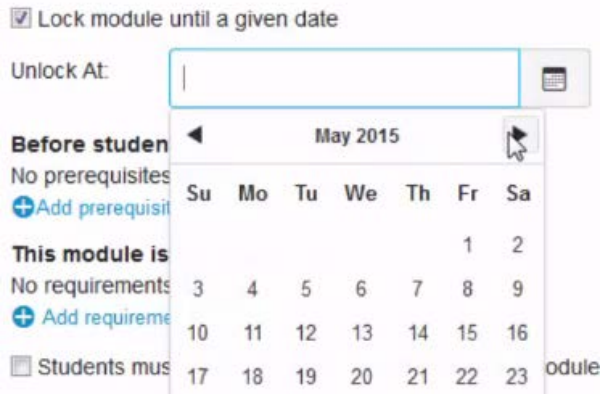

2. Click **Edit**.

3. Check the box lock module until a given date, then use the calendar icon to select the date at which the module should unlock.

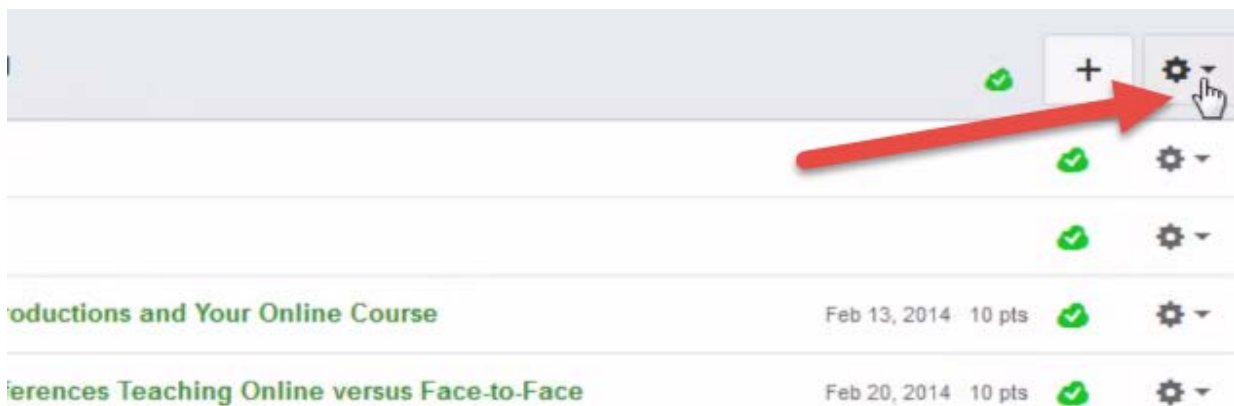

4. Click **Update Module** after unlock date has been selected.

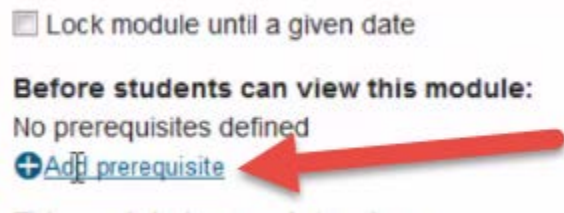

5. The unlocked information appears to the lower right of the module content.

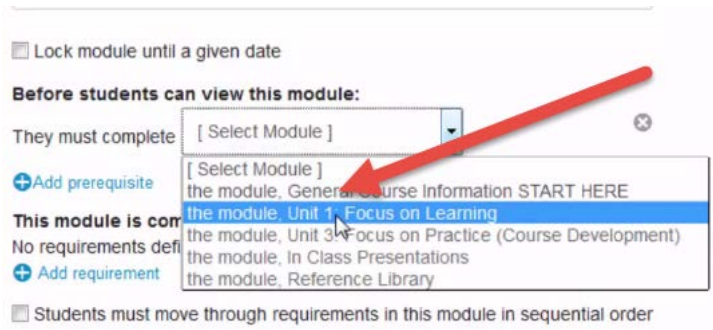

6. You can also set a module to unlock based on completion of another module or minimum grade. We can again click the **Gear Icon**.

7. Click **Edit** and then select **Add Prerequisite** button.

8. And select unit one from the drop down menu.

9. Then click **Update Module**.
