

Canvas TLC Tips for Faculty Turnitin-Canvas Integration

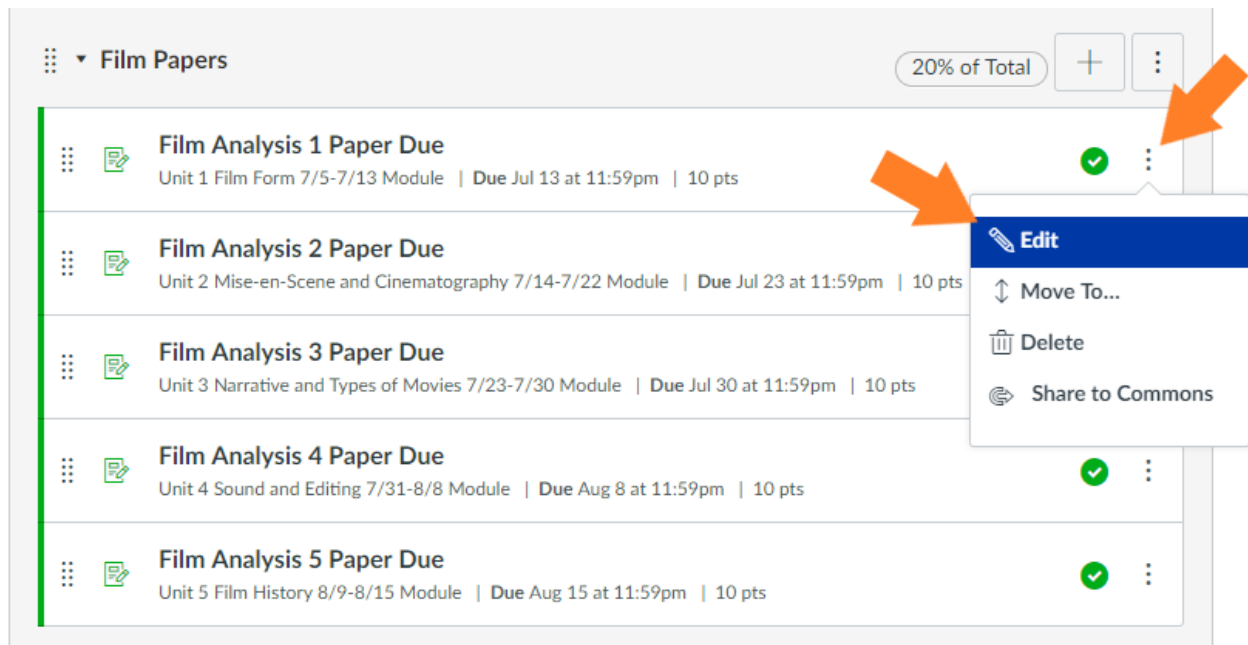

Turnitin is an academic integrity verification tool that integrates with Canvas and scans student submissions for plagiarism. This document includes two tutorials: instructions on enabling Turnitin on a **new Assignment**, and instructions on enabling the new Turnitin version on an **imported Assignment that had the old version of Turnitin enabled**.

IMPORTED ASSIGNMENT INSTRUCTIONS

On an imported assignment with the old Turnitin version enabled, an error message will appear when trying to access from student and teacher accounts (see below), sending you back to the Home page of the course. Follow the steps below to enable the new version of Turnitin.

1. Go to the **Assignments** section of your course and select the **Menu** (three dots) to the right of the Assignment, then select **Edit**.

2. Select **More Options**

Edit Assignment [Close]

Name:

Due: [Calendar Icon]
Fri Jul 13, 2018 11:59pm

Points:

3. In the Submission Type section change **External Tool** to **Online**. Skip to Step 3 below under the New Assignment Instructions.

Enter or find an External Tool URL

Load This Tool In A New Tab

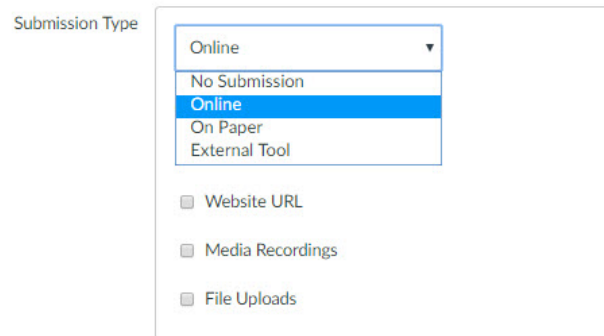

NEW ASSIGNMENT INSTRUCTIONS

1. Begin by editing your assignment in Canvas.

The screenshot shows the Canvas assignment editor interface. At the top, the title bar reads "DGMD 101 Final Paper". Below the title bar is a rich text editor toolbar with various icons for text formatting (bold, italic, underline, text color, background color), alignment, and other functions. A "HTML Editor" button is visible in the top right corner of the editor area. The main content area is a large, empty text box. Below the text editor, there are several configuration fields: "Points" is set to "100"; "Assignment Group" is set to "Assignments"; "Display Grade as" is set to "Points". At the bottom, there is a checkbox labeled "Do not count this assignment towards the final grade" which is currently unchecked. A word count indicator in the bottom right corner shows "0 words".

2. Choose **online** as the submission type.

The screenshot shows the "Submission Type" dropdown menu. The dropdown is open, displaying the following options: "Online" (selected), "No Submission", "On Paper", and "External Tool". Below the dropdown, there are three checkboxes: "Website URL", "Media Recordings", and "File Uploads", all of which are currently unchecked.

3. Select **File Uploads**. Enter **doc, docx, or PDF** into the **Allowed File Extensions** field.

Submission Type

Online

Online Entry Options

- Text Entry
- Website URL
- Media Recordings
- File Uploads
- Restrict Upload File Types

doc, docx, pdf

Enter a list of accepted extensions, for example:
doc,xls,bxt

4. The **Plagiarism Review Window** will appear directly below the Submission Type window.
