## Implementing Respondus Monitor: Test Security

---

Our institution now licenses Respondus Monitor, an add-on for Respondus Lockdown Browser. These tools lock-down or monitor the testing environment within a learning management system.

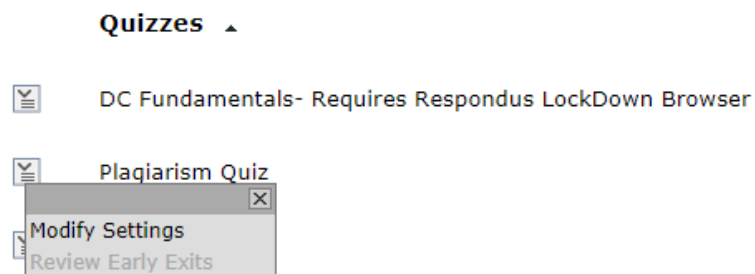

Monitor adds the student's webcam to record exams, deterring students from accessing other resources. It also ensures the right student is taking the exam. Respondus Monitor's "webcam-optional" setting is especially useful for students in online courses: students can be given the choice to take an exam with a webcam (Respondus Monitor) or in a proctored environment (Respondus LockDown Browser in a Testing Center location).

1. To enable Monitor in your exams, click LockDown Browser in your course's left-hand navigation.

**Note:** If LockDown Browser does not appear in your course navigation, add it by clicking Settings > Navigation.

2. Find the exam where you wish to enable Monitor. Click the drop-down menu to the left of the exam name and click Modify Settings.

3. Click Require Respondus LockDown Browser for this exam. Also enter a password of your choice for your exam.

**Monitor Webcam Settings**

Don't require Respondus Monitor for this exam  
 Require Respondus Monitor for this exam  
 Either Respondus Monitor or a proctored lab can be used to take this exam

Note: Students taking the exam in a proctored lab will still need to use LockDown Browser. An access code must be used with the exam (see above section) and you will need to provide the access code to the proctor.

- Click Save and Close.
- You should now see that LockDown Browser is required, and Respondus Monitor is optional

Quizzes	LockDown Browser	Respondus Monitor (webcam)
☰ DC Fundamentals- Requires Respondus LockDown Browser	Required	Not Required
☰ Plagiarism Quiz - Requires Respondus LockDown Browser + Webcam	Required	Optional

- Fill in the Test Administration Request Form on the [Testing Center's Information for Faculty webpage](#). This is important as the Testing Center will need the password for any students testing onsite. **Do not share this password with students.**
- Share this URL for students who will be testing remotely to download Respondus LockDown Browser: <http://www.respondus.com/lockdown/download.php?id=975242076>

### Best Practices:

- Include a "webcam required for online exams" statement in the class description.
- Have students take a short practice quiz early in the course to ensure proper set up and expectations.
- Include a link to the TLC's Testing with Respondus Monitor document for students in your course.
