

## Global Citizenship at Brookdale

The “Global Citizenship Project” at Brookdale aims to educate and engage students and the college community on global issues in order to improve the world in which we live and to foster a life-long commitment to global citizenship.

**Awareness – Commitment – Engagement**  
**We DARE you to CARE.**

## Global Citizenship

Global Citizenship is the application of the concept of social responsibility at a global level through active participation. A global citizen is one who is connected with the concepts of globalization, participates in ways to reduce inequities, and refrains from behaviors that hinder the well-being of others.

## Global Citizenship Awards

The Global Citizenship Awards are presented annually by the Global Citizenship Council at Brookdale. Awards are presented to faculty and students who demonstrate a commitment to bring about awareness of global issues and who engage in these issues as part of curricular assignments. They are also presented to faculty, staff, and students who demonstrate commitment and leadership toward a global issue outside the classroom through awareness campaigns, fundraisers, and other globally focused activities. The awards ceremony is made possible with support from the International Education Center.

For more information, go to <http://globalcitizen.brookdalecc.edu>.
